

CRANE MANAGEMENT WORKSHOP

Committed to Construction Training

TAKE ADVANTAGE OF VALUABLE
TRAINING THAT'S FREE OF CHARGE
FOR CONSTRUCTION CUSTOMERS
OF THE HARTFORD.

Cranes are a vital component of most construction projects and contractors must implement an effective crane management program to ensure a successful project. To help you develop or strengthen your crane management program, The Hartford is offering you and your contractors a newly developed Crane Management Workshop. Taught by experienced construction Loss Control Consultants, this workshop will be offered throughout the year in various locations. The Hartford is pleased to offer this workshop to its construction customers at no cost.

The Hartford is committed to helping your business improve safety and reduce losses.

About The Hartford's Workshop

The Hartford's Crane Management Workshop can help you recognize and control worksite hazards, improve operational efficiencies, and minimize loss. Our program includes information on the following:

- safe crane operations including proper planning and equipment selection, assignment of roles and responsibilities, effective jobsite hazard analysis, and more.
- provisions to separate and protect the general public from all crane operations including planning and training.
- understanding and complying to the Occupational Safety and Health Administration's (OSHA) new crane standard ruling effective November 8, 2010.¹

The Hartford's Crane Management Workshop combines our industry-leading loss prevention and claim expertise with industry research to introduce best practice controls and safe operating procedures. The Crane Management Workshop will review many crane-related topics not covered in OSHA's new standard like crane critical lifts, protecting the general public, contract management, and crane leasing. We can help you apply best practice controls and help you successfully achieve your goals.

¹ Occupational Safety and Health Administration. 1926 Subpart CC Cranes and Derricks in Construction (Subpart CC), developed by the Cranes and Derricks Negotiated Rulemaking Committee (C-DAC). OSHA revised this standard to update industry work practices, advances in the designs of cranes and derricks, qualification of operators, and required training.

Workshop Agenda

We present the Crane Management Workshop over a seven hour period. Individual modules are available separately over a longer period of time. Refer to our Training Calendar online at thehartford.com/losscontrol to find a class in your area. Or contact your Hartford Loss Control Consultant to schedule a class. The class size is usually limited to 35 or less to encourage attendee participation and interaction.

The modules covered during our Workshop include:

- Overview of OSHA's new Crane Standard (Subpart CC)
- Crane Accidents and Statistics
- Mobile Cranes
- Ground Conditions
- Crane Assembly/Disassembly/Transit
- Rigging
- Signaling
- Power Line Safety
- Inspection and Maintenance
- Tower Cranes
- Critical Lifts
- Hoisting Personnel (Crane Baskets)
- Public Protection
- Contract Management
- Crane Leasing
