

Accident Insurance

Coverage that helps offset costs that may not be covered under your medical plan.

Accident insurance: why is it so important?

Accidents can happen when you least expect them. And while you can't always prevent them, you can get help to make your recovery less expensive and stressful.

In the U.S. there are approximately 40 million trips to the emergency room annually due to injuries.¹ These visits can be expensive — in fact, ER bills average around \$1,233 per visit,² and even seemingly small injuries can come with unexpectedly high hospital bills.

You may be thinking — *that's why I have health insurance*. But even the best medical plans may leave you with unexpected expenses like deductibles, copays, extra costs for out-of-network care, and non-covered services.

[You can't plan for accidents, but you can handle them better by being financially prepared.](#)

How it works

Accident insurance provides a financial cushion for life's unexpected events. You can use it to help pay costs that aren't covered by your medical plan. It provides you with a lump-sum payment — one convenient payment all at once — when you or your family need it most. The extra cash can help you focus on getting back on track, without worrying about finding the money to help cover the costs of treatment.

And best of all, the payment is made directly to you, and is in addition to any other insurance you may have. It's yours to spend however you like, including for your or your family's everyday living expenses.

Whatever you need while recovering from an accident or injury, accident insurance is there to make life a little easier.
